## Front End Developer

### Description

The **front-end developer** is responsible for transforming the design and the product vision into a working product. His-Her work directly influences how users will interact with the system. This person loves clean interfaces and has a passion for great user experiences. A great front-end developer will also have a basic understanding of backend programming and will be willing to learn more to help backend developers write APIs that will help him deliver a great product.

### Responsibilities

- Build applications according to the design and provide designers with feedback and suggest tradeoffs when required
- Ensure the code follows latest coding practices and industry standards
- Work closely with backend developers to understand and properly use the systems APIs
- Write both unit and integration tests, and develop automation tools for daily tasks
- Challenge ideas and opinions to avoid pitfalls and inefficient solutions

### Qualifications

- Hands-on programming with HTML/CSS/JS languages
- Mobile development experience with React Native and responsive design
- Understanding APIs contracts with REST and GraphQL integration endpoints
- Knowledge of Object-Oriented programming
- Ability to write effective unit and integration tests
- Strong understanding of Agile methodologies
- Experience as a developer on an agile team preferred
- Strong communication skills with the ability to communicate complex technical concepts and align the organization on decisions
